

WHAT IS CLAIMED IS:

1. A bracket for a clotheshorse, the bracket (10) comprising:
a plate (13) with a top edge and multiple side edges;
multiple first collars (131) defined in a line through the plate (13)
near the top edge;
multiple slots (132) defined in the top edge of the plate (13) to
respectively communicate to the multiple first collars (131); and
a vertical socket (11) attached on the plate (13) under the first collars
(131).

2. The bracket as claimed in claim 1, wherein the plate is fan-shaped
with an arced upper edge at the top edge, two side edges, and a joint of the
two side edges; and
wherein a second collar (12) is defined in the plate (13) near a joint.

3. The bracket as claimed in claim 1, wherein the plate (13) has an
inner opening with edges; and
multiple flanges extendedly formed on the edges of the inner
opening, top edge and the multiple side edges of the plate (13), wherein the
multiple slots are defined through the flange at the top edge of the plate (13).

4. The bracket as claimed in claim 2, wherein the plate (13) has an
inner opening with edges; and
multiple flanges extendedly formed on the edges of the inner
opening, top edge and the two side edges of the plate (13), wherein the
multiple slots are defined through the flange at the top edge of the plate (13).
